Protecting the Public.

By NEIL HITT.

So many things are being done for the protection of the public nowadays that a man has to be careful he doesn't fall over them in the dark and break a leg.

The business of protecting the public backs back to the time when knighthood was in flower and men went around hitting each other with hatchets for their room and board. Protection was necessary then and a successful business man was compelled to wear iron H. V. I.s in order to take out an insurance policy in the preferred class. But nowadays people would just as soon take their chances on being wounded by a jetty bus rather than try to run for a street car in 200 pounds of stove pipe.

Disregarding the fact that the public no longer cares to be hampered with too much protection the corporation commission has established a round table for the inspection of all refined oils and is sending its knights errant thither and yon about the state to see that the "robber barons" among oil refiners don't try to sell the public whisky for gasoline. The commission feels that the motorist has a right to know the technical reason why his motor won't start on a cold morning and is determined to see to it that the man who risks his life in a flivver won't have his motor stall in mid-air.

So now when the automobile drives up to a filling station he will be confronted by a sign board giving the name of the gas and distillation test of oil he is about to buy. Maybe he will appreciate this information; maybe he won't—but it is there anyway. At least he will know the height, weight, fingerprints and other police data of the gasoline in his tank before he finds himself out on some lonely road at its mercy.

Meantime the knights errant of the corporation commission will sweep forth over their territories inspecting oil at cents per barrel. The most oiling was that oil could be inspected at the jobbers tanks in one county and the same oil inspected again at its destination in another county. But the jobbers finally convinced the heads of the round table that it wasn't chivalry to make a man ante twice for the same oil so the commission modified the point to the effect that each refiner producing oil will inspect other ones for fee "in the commission of whom the same may be when discovered." This is a very deft and definite way of putting things and gives the knight errant greater leeway.

As a rule anybody who goes out to benefit the public feels in a general sort of way that he is an important part of the public himself and that "charity begins at home." By thinking in this manner the corporation commission is able to give employment to about 100 of its unapprised constituents who otherwise might have had to mind their own business and some of them haven't any.

But the public must be protected and even a knight has to eat once in a while. Juggling techniques in order to educate the public up to

something it doesn't care anything about may be an excellent means of furnishing quota for a bunch of Don Quixotes but the round table is having an awful time trying to convince the public that it is square.

A. E. Humphries in Town.
A. E. Humphries, at the head of the Humphries Petroleum company, is in the city for the first time in more than a year and reports that he has been putting in most of his time hunting and fishing in the northern part of Colorado. He enjoys the sport and found it necessary in order to recuperate his health which was of course a fine remedy. He will be in Tulsa for the remainder of the week.

Mayor of Youngstown in City.
A. W. Craver, three times the mayor of Youngstown, Ohio, is in Tulsa for a few days. His prime motive in coming here was to be present at the bringing in of a well which he and his associates are drilling in the northeast of 23-15-14 on a lease owned by E. C. Lynch and others.

The Lucky Man Has Capitalized His Holdings.

The following letter is self explanatory and will be of great interest to many oil men who have followed the fortunes of W. J. Kampff who has been considered the luckiest man in the Osage.

Tulsa World. The operations of the Warren Petroleum company are going along smoothly. The company is doing extensive operating in the Osage and has some oil holdings in this country.

This company now has seven wells finished on 3-24-9, Nos. 3 and 9 drilling on this section; three wells on 23-22-10, No. 4 well drilling three wells on 35-27-11. One drilling; one well on 16-26-11, No. 10 drilling; one well on 23-22-10, and will make an application for a well on each of the following sections, one well on 23-22-10, one well on 4-25-10, one well on 23-22-11.

This company has made locations for five more wells on 35-27-11 and let the contract for same. They have a good deal of pipe on hand and will be held up on account of shortage of pipe for some time to come.

The leases of the Warren Petroleum company of Warren, Pa., were held in the name of W. J. Kampff until recently, when they were transferred. They just finished No. 7, 3-24-9, and with seven feet in the sand, the well started to flow 2,500 barrels a day from the big line. C. S. Khabb, president, and W. E. Messner, vice president of the company, are now in Oklahoma looking over the company's holdings.

Very truly yours,
FRED M. HARTMAN.

At Beggs.

The Twin State Oil company is drilling at 2,215 feet in its No. 2 Headrace in the southeast of the southeast of 19-15-11. The same company is drilling at 1,850 feet in its No. 1 Thompson in the northeast of 19-15-11.

The Spindletop Oil company drilling on a 10-acre strip in 35-15-11 has the sand and the well made several flows but it will doubtless be drilled deeper as the offset wells are much further in the sand.

The Riebold No. 9 in 23-15-12 reported a failure at 2,940 feet.

The Eastern Oil company also has a failure in the southeast corner of 30-15-12. Total depth 2,013 feet.

At Garber.

The Getty Oil company and the Tuloma Oil company No. 2 Hime located in the northeast corner of the southeast of the northwest of 36-22-4 are running a five-inch casting and have a showing for a well with 250 feet of oil in the hole. It is on the south edge of the development area. Top of the sand 2,558.

Logan and others have a rig up in the southeast corner of the southwest of 6-21-11. Both will be

In the Osage.

The Twin State Oil company is drilling today on its No. 8 Duncan in the southwest of 14-24-10. The well is showing oil at 2,091 feet. The same company is building a rig for its No. 9 Duncan in the same location. The same concern is setting 6½-inch casing in its No. 1 Cobb situated in 15-15-5 which has been drilled to 2,258 feet.

Garnier & Spencer have a hole full of water in the northeast of the northwest of 28-21-11 at 1,884 feet.

The Fletcher No. 1 in the northeast of 36-21-11 is dry at 2,182.

Duffield & Gillies No. 1 in the northeast of 36-21-11 is a 10-barrel well.

Duffield & Gillies No. 2 in the southwest of 27-22-10 is good for 25 barrels in sand found from 1,175-98.

Alexander No. 20 in the northeast of 30-22-10 is good for 100 barrels after a 150-quart shot in sand found from 1,888-92.

The Rex Petroleum Oil company No. 5 in 36-21-16 is a 45-barrel well.

The M. M. Co. has had failures at 2,210 feet in their No. 2 in the southwest of 15-23-11.

Shea and others have a 20-barrel well in No. 3 for the lease in the northwest of 24-23-11.

The Plowter Oil company No. 10 in the southwest of 30-22-10 is a 50-barrel well after a 225-quart shot.

The Bighorn Refining company has a well good for 75 barrels in the southwest of the southwest of 15-24-10.

The Garrelsall Oil company No. 6 in the southwest of 20-24-10 is a 10-barrel well in the Cleveland sand found at 1,431-1,442.

The System Oil company No. 2 in the northwest of 14-24-11 is a 15-barrel well in sand found from 1,522-1,533.

The Tidal Oil company drilling in the northwest of 14-24-11 has a 25-barrel well after 160-quart shot.

At Lost City.

The Twin Cities have a 3,000,000 gas well in 25-19-11 at 1,430 feet.

For sale—Drilling company consisting of two complete outfit now running.

Is a going concern with plenty of work ahead. 100-foot drilling at \$14 to \$15 per foot, cost.

Can be taken on new location either drilling at 1,300 feet. Located Cimarron county, Texas. Worth \$10,000, will take \$15,000 on reasonable terms for tool car. Address L. V. H. Moore, 416 North Ashton street, El Dorado, Kan.—Advt.
